

## High Value Learning for Dispersed Teams

We understand why organisations with dispersed and/or voluntary workforces like the thought of e-learning in particular because of the reduced costs and increased accessibility associated with this type of delivery. However, although it is cheap and easy to distribute, it isn't always as effective as clients might hope.

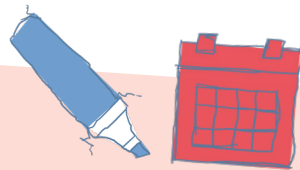

Quanta have worked to develop a method of delivering Blended Learning Programmes that combine many of the benefits of e-learning with the benefits of face-to-face training.

### How

Our trainers work with you to identify a select group of your people who will receive face-to-face training. We video this training and subsequently turn it into learning materials that are then used by your remote learners.

The select individuals who received face-to-face training go on to become learning champions in the organisation, supporting other users as they in turn learn remotely from the recorded video sessions.

### Steps

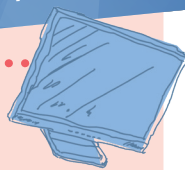

**1** Classroom Training Delivered to Learning Champions

**2** Videos Compiled from Classroom Training

See a sample video at [quanta.co.uk/about-quanta/blended-programmes](http://quanta.co.uk/about-quanta/blended-programmes)

**3** Remote Learners use Video to Learn Supported by Learning Champions

### Why Does it Work?

- It's bespoke – your people, your materials, your systems
- Learning champions drive and support rollout
- Strong learning champion buy-in

### Which Courses?

- Many Quanta Nutshell Courses and Modules can be delivered this way
- It is particularly effective for products in the technical portfolio
- Call us to discuss your needs
