

Track

RED

COURSES FOR THE **ATTACKERS** External or internal security experts who simulate real-world cyber threats to test an organisation's defences, vulnerabilities, and incident response capabilities.

BLUE

COURSES FOR YOUR ORGANISATION'S **DEFENDERS** In-house security professionals responsible for maintaining and monitoring the security infrastructure.

Foundation

CompTIA Security +

A practical course covering network security, compliance, operational security, cryptography, application data and host security, threats and vulnerabilities, and identity management
Prerequisites: CompTIA Network+ course, or CISCO ICND1, or equivalent.

Cyber Matters - An Introduction to Cyber Security

Introduction to security and cyber related topics, covers fundamentals of security, areas it is applied and the importance policy integration. **Prerequisites:** None but a general appreciation of IT business functions.

Intermediate

CompTIA PenTest+

Verifies that learners have skills to plan and scope an assessment, understand legal / compliance requirements, perform vulnerability scanning / penetration testing, analyse data, and effectively report and communicate results.
Prerequisites: Network+, Security+ or equivalent knowledge. 3 years hands-on information security experience or equivalent.

Certified Ethical Hacker

Industry leading qualification that equips individuals for a career in penetration testing or red team deployment. Covers required theory and hands on experience through in-depth labs and exercises. **Prerequisites:** Knowledge of Networking and Security. 2 years' IT work experience, Linux, or Unix familiarity.

CompTIA CySA+

Focusses on frameworks and technologies used to and protect IT systems. CySA+ is an IT workforce certification that applies behavioural analytics to networks and devices to prevent, detect and combat cybersecurity threats.
Prerequisites: CompTIA S+ course or equivalent.

Certified Information Systems Security Professional (CISSP)

CISSP reviews the entire information security landscape, addressing the eight domains of the common body of knowledge. **Prerequisites:** Two domains in the CBK, for 5 years or more (4 years with relevant degree level certification). Associate status can be achieved without full experience.

Advanced

CompTIA SecurityX

Advanced hands-on, performance-based certification for practitioners. Certified professionals figure out how to implement solutions within cybersecurity policies and frameworks. **Prerequisites:** 10 years' IT administration, 5 years hands-on tech experience, CompTIA S+ / CYSA+.

Certified Information Security Manager (CISM)

Prepares delegates for the CISM exam and covers all associated job practices. Covers key syllabus areas and concepts / process that someone performing this job must understand. **Prerequisites:** Understanding core concepts of Information Security. Cyber Matters, CompTIA Security+, RESILIA or equivalent.
